Education

Pimpri Chinchwad College of Engineering (PCCOE), Pune

2023 – 2027

- *Bachelor of Technology in Information Technology* SGPA: 7.8 — CGPA: 7.1
Selected among the Top 100 students for the PCCOE Platinum Placement Batch.
- My Professional Portfolio Link : [Niranjani Phadtare](#)

Technical Skills

Programming Languages : C, C++, Java, Python, SQL

Core Computer Science : Data Structures & Algorithms, Object-Oriented Programming, DBMS, CN

Web Technologies : HTML, CSS, JavaScript

Cloud & Tools : AWS(EC2, S3, IAM- Fundamentals), Git/GitHub, VS Code and IntelliJ IDEA.

AI/ML : Scikit-learn, Pandas, NumPy, Matplotlib, Machine Learning Fundamentals (Regression, Classification)

Experience

WebHub Technology, Pune

Oct 2025 – Dec 2025

Software Engineer Intern

- Contributed to application development activities by implementing assigned features and supporting project deliverables.
- Identified and resolve bugs during testing cycles, improving application stability ahead of release.
- Collaborated with senior developers to understand system architecture, development workflows, and real-world software engineering processes.
- Demonstrated strong analytical thinking, problem-solving skills, and a proactive learning approach throughout the internship.

Projects

GitHub Link : [GitHub](#)

Expense Tracker System - Java, MySQL, HTML, CSS, JavaScript, Spring Boot, REST API, POSTMAN API

- Developed a full-stack expense management application supporting concurrent users with secure **JWT based authentication** and **MySQL** database integration.
- Built **CRUD API's(Java + Spring Boot)** operations reducing manual expense entry time by enabling categorized search across 100+ records
- Applied Object-Oriented Programming principles, **JDBC connectivity**, and optimized SQL queries for efficient data processing.

GymIQ: Personalized Fitness & Body Analysis Platform (AIML) -

Python, Django REST Framework, Scikit Learn, Matplotlib, Pandas, MySQL, HTML, CSS, JavaScript

- Implemented machine learning models for body-fat estimation and fitness progress analysis using anthropometric and activity data.
- Built personalized **vegetarian/non-vegetarian diet and exercise recommendations** based on user goals, body metrics, and activity levels.
- Developed RESTful APIs using **Django REST Framework** and integrated MySQL for managing user profile

Advanced Bank Management System - C++, OOP, STL, File Handling

- Designed a banking system **using unordered_map for average O(1)** account retrieval.
- Implemented transaction history tracking using stack-based data structures to support undo operations.
- Optimized account sorting and management using custom STL comparators and object-oriented design principles.

Achievements

- **Smart India Hackathon (SIH) 2025 – Software Edition Participant.**
Team Leader of a 6-member team developing a digital mental health support platform.
- **Reached the Final Round of Praxis Competitive Programming Event (March 2024)**
- **Solved 350+ Data Structures and Algorithms problems on LeetCode.**

Certifications

- Java Full Stack
- C++ Programming
- Data Structures
