Education

Pimpri Chinchwad College of Engineering (PCCOE), Pune

2023 – 2027

- Bachelor of Technology in Information Technology SGPA: 7.8 — CGPA: 7.1
- Selected among the Top 100 students for the PCCOE Platinum Placement Batch.
- My Professional Portfolio Link : <https://niranjanyphadtare.github.io/Niranjany-Phadtare-Portfolio-2.0/>

Experience

WebHub Technology, Pune

Oct 2025 – Dec 2025

Software Developer Intern

- Contributed to application development activities by implementing assigned features and supporting project deliverables.
- Assisted in writing, testing, and debugging code while adhering to software development best practices and coding standards.
- Collaborated with senior developers to understand system architecture, development workflows, and real-world software engineering processes.
- Demonstrated strong analytical thinking, problem-solving skills, and a proactive learning approach throughout the internship.

Projects

Expense Tracker System — Java, MySQL, HTML, CSS, JavaScript, Spring Boot, REST API, POSTMAN API

- Developed a full-stack expense management application with secure user authentication and MySQL database integration.
- Implemented CRUD operations, expense categorization, and search functionality to improve expense tracking and management.
- Applied Object-Oriented Programming principles, JDBC connectivity, and optimized SQL queries for efficient data processing.

Eco-Gallery – Indoor Tree Plantation Platform — HTML, CSS, JavaScript

- Led a 4-member team in designing and developing a web platform focused on indoor plant care awareness and sustainability initiatives.
- Built responsive and interactive user interfaces, improving accessibility and user experience across multiple devices.
- Enabled user engagement through content-sharing features and interactive platform components.
- Managed sprint planning, task allocation, and project coordination, ensuring timely project completion.

Advanced Bank Management System — C++, OOP, STL, File Handling

- Designed and developed a banking management system using unordered map for efficient O(1) account retrieval operations.
- Implemented transaction history tracking using stack-based data structures to support undo operations.
- Optimized account sorting and management using custom STL comparators and object-oriented design principles.

Technical Skills

Programming Languages: C, C++, Java, Python, SQL

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, CN

Web Technologies: HTML, CSS, JavaScript

Cloud & Tools: AWS(EC2, S3, IAM- Fundamentals), Git/GitHub, VS Code and IntelliJ IDEA.

Achievements

- Smart India Hackathon (SIH) 2025 – Software Edition Participant.
Team Leader of a 6-member team developing a digital mental health support platform.
- Reached the Final Round of Praxis Competitive Programming Event (March 2024), focused on problem-solving using C/C++.
- Solved 300+ Data Structures and Algorithms problems on LeetCode.

Certifications

- C Programming, C++ Programming, Data Structures, Java Full Stack, HTML, CSS, JavaScript, MySQL
